

Coachella Computer Aid

BRAND BIBLE

Help that feels like a neighbor.

Personalized Technology Help for Everyone

VERSION 1.0 • THE SOURCE OF TRUTH

What's inside.

This book is the single source of truth for Coachella Computer Aid. Every website page, flyer, workshop handout, and Facebook post should be able to trace its choices back to a rule in here.

14 Roadmap

Why we exist.

OUR MISSION

To empower people throughout the Coachella Valley by making technology **accessible, understandable, and less intimidating — with patient, personalized support for seniors, people with disabilities, immigrant families, veterans, and anyone facing digital barriers.**

OUR VISION

A community where technology creates opportunities instead of obstacles, and every person — regardless of age, income, language, or ability — has the confidence to connect, learn, work, and thrive.

The reason underneath.

Technology has become essential for everyday life — staying connected with family, accessing healthcare, applying for jobs, managing money, and taking part in the community. Yet many people are left behind, because technology can feel overwhelming or out of reach.

We believe no one should be excluded simply because they need a patient teacher.

This page may never appear publicly — but it's the heart of everything. The work isn't repairing machines. It's teaching confidence: helping someone make their first video call, spot a scam before it costs them, or fill out a form that felt impossible an hour ago. Those are the moments this organization exists for.

What we stand on.

Patience

We teach at your pace. Never rush, never judge.

Community

Technology should bring people together.

Inclusion

Everyone deserves access. No exceptions.

Education

We don't just fix problems — we teach.

Trust

Privacy, security, and honesty in every session.

Kindness

Everyone should leave more confident than they arrived.

Accessibility

Large text, high contrast, and adaptive tools are the default — not an afterthought.

People, not demographics.

Seniors

Staying connected with family, avoiding scams, and using technology with confidence.

People with Disabilities

Adaptive tools, accessibility features, and personalized support that meets each person where they are.

Spanish-Speaking Families

Bilingual help with devices, school portals, healthcare sites, and government resources.

Veterans

Navigating VA portals, telehealth appointments, and online benefits.

Low-Income Families

Affordable support, plus connections to low-cost internet and device programs wherever possible.

Anyone Overwhelmed by Technology

Whether you're 18 or 98 — if technology feels confusing, we're here to help.

Who we are (and aren't).

Imagine if these four had a child — that's the feeling every touchpoint should carry: the clarity of **Apple**, the welcome of a **public library**, the calm of a **national park visitor center**, and the warmth of a **neighborhood community center**.

WE ARE NOT

Geek Squad

Best Buy

A computer repair shop

Corporate or cold

Full of jargon

WE ARE

Friendly & patient

Educational

Community-first

Warm & local

Inclusive & trustworthy

People should feel like they're visiting a neighborhood community center — not a repair counter.

Say it warmly.

Every sentence should lower a person's anxiety. We describe the **outcome someone wants**, never the technical process. When in doubt, write it the way you'd say it to a neighbor across the fence.

NEVER SAY

Virus removal

WE SAY

We'll help get your computer running smoothly again.

NEVER SAY

Remote desktop support

WE SAY

We can safely help you from home, if you'd like.

NEVER SAY

Computer diagnostics

WE SAY

We'll figure out what's going on together.

NEVER SAY

Submit/Error 404

WE SAY

Send → and plain, kind guidance when something goes wrong.

07 · THE EMOTIONAL GOAL

When someone arrives, they should feel...

Welcome · Understood · Safe to ask questions

Encouraged · Less intimidated · Hopeful they can learn

That emotional experience is as important as the information itself. If a design informs but doesn't reassure, it isn't finished.

Warm by default.

Cream
#FDF6EC
Primary background

Sand
#F8E9D5
Secondary surface

Warm Orange
#F4A259
Primary accent · fills

Sky Blue
#78B8D9
Support accent

Sage Green
#8BAE7B
Support accent · success

Charcoal
#343434
Body text

Accessibility rule. Warm Orange, Sky, and Sage are for **fills and large shapes** — they don't pass contrast as small text on cream. For orange **text or links**, use the deeper **Clay #B95E23**. Body copy is always Charcoal #343434 on Cream, which clears WCAG AA comfortably.

Clay #B95E23 · text-safe

Sky-Deep #3B7A9B · text-safe

Sage-Deep #5E7E4F · text-safe

Big, round, readable.

Two rounded, humanist faces — chosen because they stay friendly at large sizes and legible for older eyes. **Nunito** carries headlines; **Nunito Sans** carries body. Both are free and open, so the whole ecosystem can use them at no cost.

Nunito · 900
Display

We'll figure it out
together

Nunito · 800
Headings

Patient help, at your pace

Nunito Sans · 400
Body · 18px min

Technology should make life easier — not more confusing. We'll walk through it one step at a time, as many times as you need.

Nunito · 800
Labels / eyebrows

WHO WE HELP

Size floor. Body text never drops below **18px** on screen (16px absolute minimum for fine print). Line length caps around 70 characters, with generous line-height (1.6+) so paragraphs never feel dense.

One warm world.

ALWAYS

- Soft rounded edges
- Flat shapes, gentle gradients
- Warm natural lighting
- Smiling, relaxed people
- Only the six brand colors
- Generous breathing room

NEVER

- Dark corporate colors
- Hard shadows or sharp edges
- Angry or stressed expressions
- Stock-photo realism
- Tiny text or clutter
- Cold, clinical framing

North star: Google Illustrations × Apple × Airbnb × a National Park visitor center. Every image should look like it came from the same hand.

Faces you'll see again.

Instead of random strangers, we build a small cast of recurring characters — our version of the Duolingo owl. Over time, the community recognizes them on sight.

Robert

72 • RETIRED TEACHER

Blue cardigan, golden retriever, always smiling.

Maria

68 • PATIENT LEARNER

Orange sweater, houseplants, Spanish-speaking.

Helen

76 • INDEPENDENT

Loves video calls with the grandkids. Cheerful.

Carlos

RETIRED VETERAN

Tablet and a coffee mug; manages appointments online.

Ana

28 • VOLUNTEER

Laptop and backpack. Always ready to help.

David

WORKS REMOTELY

Wheelchair user; relies on accessibility software.

Built for everyone.

Accessibility isn't a feature we add at the end — it's the baseline the whole system is measured against. Target: **WCAG 2.1 AA and beyond.**

- ✓ **Large text by default**
18px+ body, scalable without breaking layout.
- ✓ **Full keyboard navigation**
Visible focus rings on every control.
- ✓ **Reduced-motion respected**
Animations soften or stop on request.
- ✓ **Large touch targets**
44px minimum; easy to tap with less-steady hands.
- ✓ **AA contrast, verified**
Charcoal on cream; text-safe accent shades.
- ✓ **Screen-reader ready**
Semantic markup, alt text, ARIA labels.
- ✓ **Bilingual from day one**
English and Spanish, equal footing.
- ✓ **Plain language**
No jargon; short sentences; clear next steps.

The litmus test.

Before anything ships — a page, a flyer, a button — it has to pass these. If the answer isn't **yes**, we redesign it.

- 1** Is it easy to read?
- 2** Would an 80-year-old understand it?
- 3** Is it warm?
- 4** Does it reduce anxiety?
- 5** Is it welcoming?
- 6** Does it build trust?

Built to grow.
